DESIGN SOLUTIONS FOR ADDITIVE MANUFACTURING

Our team creates innovative and sophisticated design solutions. Voxel builds on our proprietary AI-based software to produce designs better and faster. We produce prototypes, pilot runs, and limited in-house productions for a seamless workflow.

RAPID PROTOTYPING

Personal service is our priority. You can expect rapid responses and prototypes unique to your project needs. Using our machinery, we deliver prototypes in titanium, nylon, high-performance PEEK, PEKK, Ultem 9085, Ultem 1010, and a wide range of other polymers.

IN-HOUSE PRODUCTION

Our HP 5200 and Xact Metal are dedicated to nylon and titanium. With this equipment, we run pilot and small production quantities. We pride ourselves on our exceptional responsiveness to your tight production schedule.

INDUSTRIES WE'VE SERVED

DEFENSE | MEDICAL | AEROSPACE | TRANSPORTATION | TECHNOLOGY

Voxel has the skills and the equipment to support your additive manufacturing project. Our experience in all phases of additive design and processing enables us to tackle your toughest design challenges. Whether you are looking for a quick turnaround, a prototype, pilot runs or production quantities, we are equipped to help.
